- Ondřej Krajíček – Chief Technology Officer, Board Member

Y Soft was founded in the city of Brno, Czech Republic in 2000. At a time when no entrepreneurial incubators existed in the Czech Republic, a couple of students – today we would call them a “startup” – created a company with the vision of developing into a truly global Czech company. By 2003, YSoft SafeQ emerged as a product with the potential to fulfill the vision of a successful, global IT company that helps companies Build Smart Business. Today, Y Soft employs more than 300 people, 260 of whom are based in the Czech Republic and 42% are in R & D.

Product and Services Portfolio

Today's organizations are looking for ways to work smarter when implementing enterprise office solutions. Organizations need a platform to integrate multiple office solutions. The platform approach also gives Y Soft the flexibility to offer new innovative products and services all while staying true to our mission to Build Smart Business.

YSoft SafeQ Platform

YSoft SafeQ is a workflow solutions platform designed to meet the growing needs of organizations looking to manage and reduce print service costs efficiently across 2D and 3D printer fleets, to create more efficient, digital workflows and to increase document security.

YSoft be3D eDee – for Educational Institutions

As a unique learning and student motivational tool, 3D printers are experiencing high growth in education. As they become connected to campus-wide networks, the need to manage costs and establish efficient workflows is solved by eDee, the first fully-featured 3D printer integrated with print management and an accounting system.

Y Soft Ventures

Y Soft Ventures is the venture capital arm of Y Soft Corporation. Based on a “Genuinely Smart Money” approach, the group looks to invest in innovative startups whose promising products or services combine software and hardware to deliver solutions with far-reaching potential. In addition to funding, Y Soft Ventures is able to use its resources in manufacturing, global distribution, marketing and logistics to increase the speed of success.

YSoft Labs

YSoft Labs is a technical innovation center where new ideas are developed to shape our future. With the freedom to explore novel areas for business growth, YSoft Labs attracts the brightest minds to develop new products and services and to anticipate the needs of our customers and partners. Whether it is exploring opportunities in the cloud, robotics, the Internet of Things or business management processes, YSoft Labs is an internal playground where our R & D and other development teams can experiment and flex their creativity.
