

YSoft **OMNI Series**

# CONNECT TODAY TO UNIVERSAL PRINT

## IN-MARKET PRINTERS ARE INSTANTLY AND COST-EFFECTIVELY UNIVERSAL PRINT COMPATIBLE

Protect and extend the value of your current printers and support your hybrid office/home staff with cloud printing. YSoft OMNI Series™ instantly connects printers<sup>1</sup> to the cloud, providing cost savings with no IT resources required. OMNI Series consists of:

- YSoft OMNI Bridge™, an affordable, serverless Edge device.
- YSoft OMNI Apps™, subscription-based software for cloud-based printing.

The first OMNI App is YSoft OMNI UP365™ which connects your printers to Universal Print (UP) features in Microsoft 365®. Universal Print moves key Windows Server print functionality to the cloud. No more managing on-premises print servers or installing printer drivers.

<sup>1</sup> IPP-enabled and PDF compatible printers. Check your printer manual for details.

# YSOFT OMNI UP365

The affordable way to connect your existing printers to Universal Print in the Microsoft 365 Cloud.

Unless you purchase new printers or pay for costly firmware updates (if firmware updates are even made available for older printers), the only option for using Universal Print is a dedicated Windows 10 machine to host the software connector Microsoft supplies. This defeats the point of reducing server costs and IT resources. With the OMNI UP365 App, you can be printing in the cloud in minutes at a fraction of the cost of traditional printing.

## VERSATILE CLOUD PRINTING FEATURES FOR YOUR EXISTING PRINTERS

### LEVERAGES THE MICROSOFT 365 CLOUD

- Eliminates provisioning and managing a Windows device
- Ensures secure printing
- Extensible with additional OMNI Apps beyond Universal Print functionality

### ZERO TRUST NETWORK, ZERO IT RESOURCES

- Cloud Authentication
- Out of the box security
- Zero effort to deploy
- No print servers required

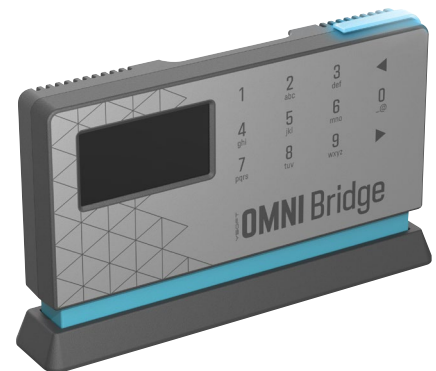

### HIGH AVAILABILITY FEATURES

- Load Balancing
- Redundancy / Failover
- Remote management
