

PURE CLOUD PRINTING ON CANON MFPs

With the Pure Cloud Terminal for Canon MFPs, users can access SAFEQ Cloud directly from the MFP panel. This serverless connection enables secure, frictionless cloud print and scan—so your colleagues can print from anywhere and release jobs safely at the device, and your IT team can control everything from one place.

DIRECT CLOUD PRINTING & SCANNING FROM YOUR CANON DEVICES

- ✓ **Ditch the print server:** Your Canon MFPs interface directly with SAFEQ Cloud. The pure cloud terminal reduces deployment complexity, lowers infrastructure overhead, and lets you scale across locations with ease.
- ✓ **Embrace the integrated experience:** The embedded application is equipped with an all-in-one home screen for all your print and scan needs, including various one-touch scan workflows right at your fingertips.
- ✓ **Supercharge print security:** Avoid sensitive information ending up in the wrong hands. Keep print workflows on hold until a user authenticates themselves at the device.

HOW THE PURE CLOUD TERMINAL WORKS

1. Send your print job

Print to any supported Canon device, from anywhere. Your job waits securely in the cloud.

2. Head to your MFP

Walk up to your nearby Canon MFP. Tap your badge or enter your PIN. The printer confirms your identity before release.

3. Release your print job

Once your identity is confirmed, release and collect your documents. No documents left behind. No privacy risk.

THE DIFFERENCE SAFEQ CLOUD MAKES

THE CHALLENGE TODAY

- ✓ Print servers are expensive to run, patch, and replace
- ✓ Rolling out to new offices means having to ship hardware
- ✓ IT firefights printer issues instead of focusing on real work

SAFEQ CLOUD

- ✓ Canon MFPs connects directly to the cloud. No server needed
- ✓ Offices roll out with web-based setup (no hardware shipments)
- ✓ IT manages the entire fleet from one admin console

"SAFEQ Cloud turns your Canon printers into a managed cloud service: Secure at the device, visible across the fleet, and ready to scale as your business grows."

CHOOSE THE SAFEQ CLOUD PLAN THAT FITS YOUR ORGANIZATION

	BREEZE	PRO
Best for	Teams that are ready to get rid of print servers and embrace the cloud.	Teams with hybrid infrastructure, strict identity requirements, or legacy print systems.
Canon terminal	Cloud-based job release, user authentication, and usage reporting.	Everything in Breeze plus hybrid gateways.
Sign-in options	Microsoft Entra ID or Google Workspace.	Adds Active Directory, LDAP, Auth0, OIDC, and PingID.
Infrastructure	Cloud-first. Minimal on-site footprint.	Cloud plus optional on-site gateways for spooling, legacy connectivity, and redundancy.
Availability & support	Standard cloud support for everyday print needs.	99.9% uptime target, faster critical incident response, and reserved hosting.
Right for you if...	You want to cut IT overhead and get secure cloud print up and running quickly.	You need advanced integrations, stricter SLAs, or hybrid cloud/ on-prem architecture.
